nGRND™

OVERVIEW PRESENTATION · OCTOBER 2026

Gold in the ground powers the Ecosystem

A new market for verified gold that stays in the ground, and the protocol that makes it work: a dual treasury, a participation economy and rewards paid in stablecoins.

ngrnd.io

NGRND does not represent ownership of Preserved Gold or any underlying mineral interest. Rewards are conditional, not guaranteed.

Disclaimer

This presentation is provided for informational and discussion purposes only and does not constitute an offer to sell or a solicitation of an offer to buy any commodities, securities, digital or financial instruments. The information contained herein is not investment, legal, tax, or financial advice and should not be relied upon as such. Prospective participants should conduct their own due diligence and consult independent professional advisors before making any token purchasing decisions.

Any tokens, products, or instruments described herein are conceptual in nature and may be subject to regulatory review, licensing, or approval in relevant jurisdictions. Participation in any token offering may be limited to qualified or accredited investors, depending on applicable securities laws.

Forward-looking statements, projections, and forecasts included in this presentation are based on current assumptions and estimates that involve risks and uncertainties. Actual results may differ materially due to factors such as market volatility, price fluctuations, regulatory changes, or operational developments. The value of tokenised in-ground gold, any associated carbon programmes, projects or carbon credits, ESG projects, and any other projects or programmes depend on numerous variables, including, but not limited to, geological verification, future extraction feasibility, and environmental or regulatory compliance.

No representation or warranty, express or implied, is made as to the accuracy or completeness of the information contained in this document. There is no guarantee of liquidity or profitability, tokenised products, or any other projects or programmes described. This presentation and its contents are copyright protected, confidential and intended solely for the recipient. Unauthorised copying, distribution, or disclosure is strictly prohibited.

By accepting and reviewing this information, you acknowledge that you understand and agree to the above terms, conditions and limitations.

Risk of total loss

NGRND is a utility token, not a security. It confers no equity, dividend, voting or repayment right. Digital assets are volatile, purchases are final and non-refundable, and tokens may be locked by vesting or staking. You may lose the entire amount you pay. Read the full risk disclosure and the Terms of Sale before purchasing.

As published in the buy.ngrnd.io risk notice.

THE PROBLEM

How to Create a New Market For Gold

Mined gold

MATURE MARKET

Bullion, ETFs and vaulted tokens. About 216,265 tonnes above ground.

- Trades daily, priced to the gram
- On-chain versions are vault receipts
- Little or no yield, minimal utility
- Supply fixed by what has been dug up

World Gold Council 2025; whitepaper comparison

The option to mine

MATURE MARKET

Junior mining equity. About 184,000 tonnes of verified resources still undeveloped.

- 7 to 20 years from discovery to production
- Around 30% held by junior miners
- Constrained by capital, permitting or environmental sensitivity
- Value stranded for decades

ICMM 2025, USGS 2025, LBMA / Webb 2026

Gold kept in the ground

EVOLVING PRESERVED GOLD OPPORTUNITY

Verified, valuable and intentionally unmined.

- Leverages existing verification physical standard for Preserved Gold
- Remains *in situ* – in the ground
- The land above it goes to work and generates revenues
- No environmental impact – Avoided Mining it instead costs 792 kg CO_2, 8,100 L of water and 1,730 kWh per ounce taken out of ground

S&P Global 2024; Norgate & Haque 2012, illustrative LCA benchmarks

nGRND is building the third market: verified gold that stays in the ground, with the land above it put to work.

WHY THE VALUE EXISTS

Where the value comes from

1

Below ground: a real, verified asset

Gold verified under NI 43-101, JORC, S-K 1300 or SAMREC, bought by the nGRND Group and held under independent digital custody. Its value moves with gold, and appreciation can be realised.

2

Above ground: land that earns for decades

Each Preserved Site carries monetisation rights for 30 to 100 years across six revenue pillars. A portion of Site programme revenues flow to the staking and rewards pool. First agreement signed, deposit paid.

3

Measured, so it is bankable

Digital MRV, satellite monitoring, IoT, drones and eDNA sampling, integrated into on-chain records. Impact that can be audited can be sold.

4

Participation that creates demand

347,082 platform accounts across eight streams and eight partner DSBT routes before TGE. Rewards reach participants in USDC or USDT, so value is realised rather than promised.

Two of these are assets, two are what make the assets pay. Rewards are paid from realised Preserved Gold appreciation, site programme distributions, ecosystem and other revenues, not from new NGRND.

Programme aims and environmental potential, not verified project outcomes. NGRND does not represent ownership of Preserved Gold or any underlying mineral interest. Rewards are conditional, not guaranteed.

WHY A PROTOCOL

What a new market needs, and what the Gold Protocol supplies

A MARKET NEEDS	THE PROTOCOL SUPPLIES
A verification standard	Geological verification under NI 43-101, JORC, S-K 1300, SAMREC or equivalent; a regulated independent digital custodian records ownership and custody.
A unit of account	For every 35,000 NGRND in circulation, at least one ounce of Preserved Gold is purchased into the Protocol Treasury.
A way to monetise	Site Programmes across six revenue pillars, each with a feasibility study by independent ecological and sustainability specialists.
A way to measure	dMRV and eDNA data from site programmes written to on-chain records for tamper-resistant audit trails.
A way to distribute value	The Staking and Rewards Ecosystem on Base: a free DSBT credential, eight participation streams, partner routes, and eligible rewards paid in stablecoins.

A company can own the gold. Only a protocol can be the market: open, verifiable and shared by every participant and partner.

THE STRUCTURE

Two entities, two jobs

ASSET LAYER

nGRND Group

- Acquires verified in-ground gold and keeps it preserved
- Secures site monetisation rights for 30 to 100 years
- Site monetisation conducted by independent specialists
- Holds Preserved Gold under independent digital custody
- Makes distributions to the Protocol from gold and site revenues
- Creation of a Gold Token to provide buyers with verified in-ground digital gold (proposed late Q4 2026 / early Q1 2027

A company that owns and monetises gold assets

Distributions

Protocol buys Preserved Gold from the Group, 35,000 : 1

MARKET LAYER

nGRND Gold Protocol

- Issues the free DSBT credential and the NGRND utility token on Base
- Buys at least 1 oz of Preserved Gold into the Protocol Treasury for every 35,000 NGRND in circulation
- Holds the Protocol Token Treasury, the operating reserve
- Runs the Staking and Rewards Ecosystem: eight streams, Reward Levels, partner routes
- Distributes eligible rewards to participants in USDC or USDT

An open network that distributes rewards to participants

The asset sits with the Group. The market runs on the Protocol. They are governed differently, on purpose. NGRND does not represent ownership of Preserved Gold or any underlying mineral interest. Rewards are conditional, not guaranteed.

THE TOKEN'S JOB

Participation, not ownership

WHAT NGRND IS

- The utility token of the Gold Protocol, built on Base
- Staking sets your Reward Level and multiplies the points your participation earns
- Used for access, payments, Reward Levels and participation in the Governance stream

WHAT NGRND IS NOT

- Not ownership of Preserved Gold or any underlying mineral interest (forthcoming with the proposed nGRND Gold Token)
- Not a share of Protocol or corporate revenue or profit
- No equity, dividend, voting or repayment right
- Rewards are conditional, not guaranteed

WHY THIS DESIGN MATTERS TO A HOLDER

Value flows to activity

Points come from the eight streams. Staking alone earns a passive baseline; acceleration comes from taking part.

Paid from revenue, not issuance

Rewards come in USDC or USDT from realised gold appreciation, site distributions and ecosystem revenues. Holders are not diluted to pay them.

Built for an open network

A participation credential and a utility token can be used by partners, listed and held globally. A claim on a mineral asset could not.

Risk of total loss. NGRND is a utility token, not a security. It confers no equity, dividend, voting or repayment right. Purchases are final and non-refundable. You may lose the entire amount you pay. Read the full risk disclosure and the Terms of Sale before purchasing.

WHY HOLDERS SHOULD CARE

Rewards are paid in stablecoins, not in newly issued NGRND

Funded by revenue, not emissions

Rewards come from realised Preserved Gold appreciation, site programme distributions, ecosystem and other revenues. Paid in USDC or USDT.

A fixed rewards pool

The Staking and Rewards allocation is 8.5M NGRND (1% of supply): a fixed pool, not new emissions.

Supply discipline

No more than 5% of tokens released in any month after TGE. Unsold inventory returns to Treasury. Buy-backs and burns are discretionary, revenue-funded and governed.

Staked from day one

Purchased tokens still in vesting are automatically staked and accrue rewards before release. Vesting and release schedules are unchanged.

REWARD POOL VALUE

$338,924 USD

Rewards value as of October 27, 2026

REDEMPTION CALENDAR

31 March 2027

First redemption of Reward Points, subject to qualifications.

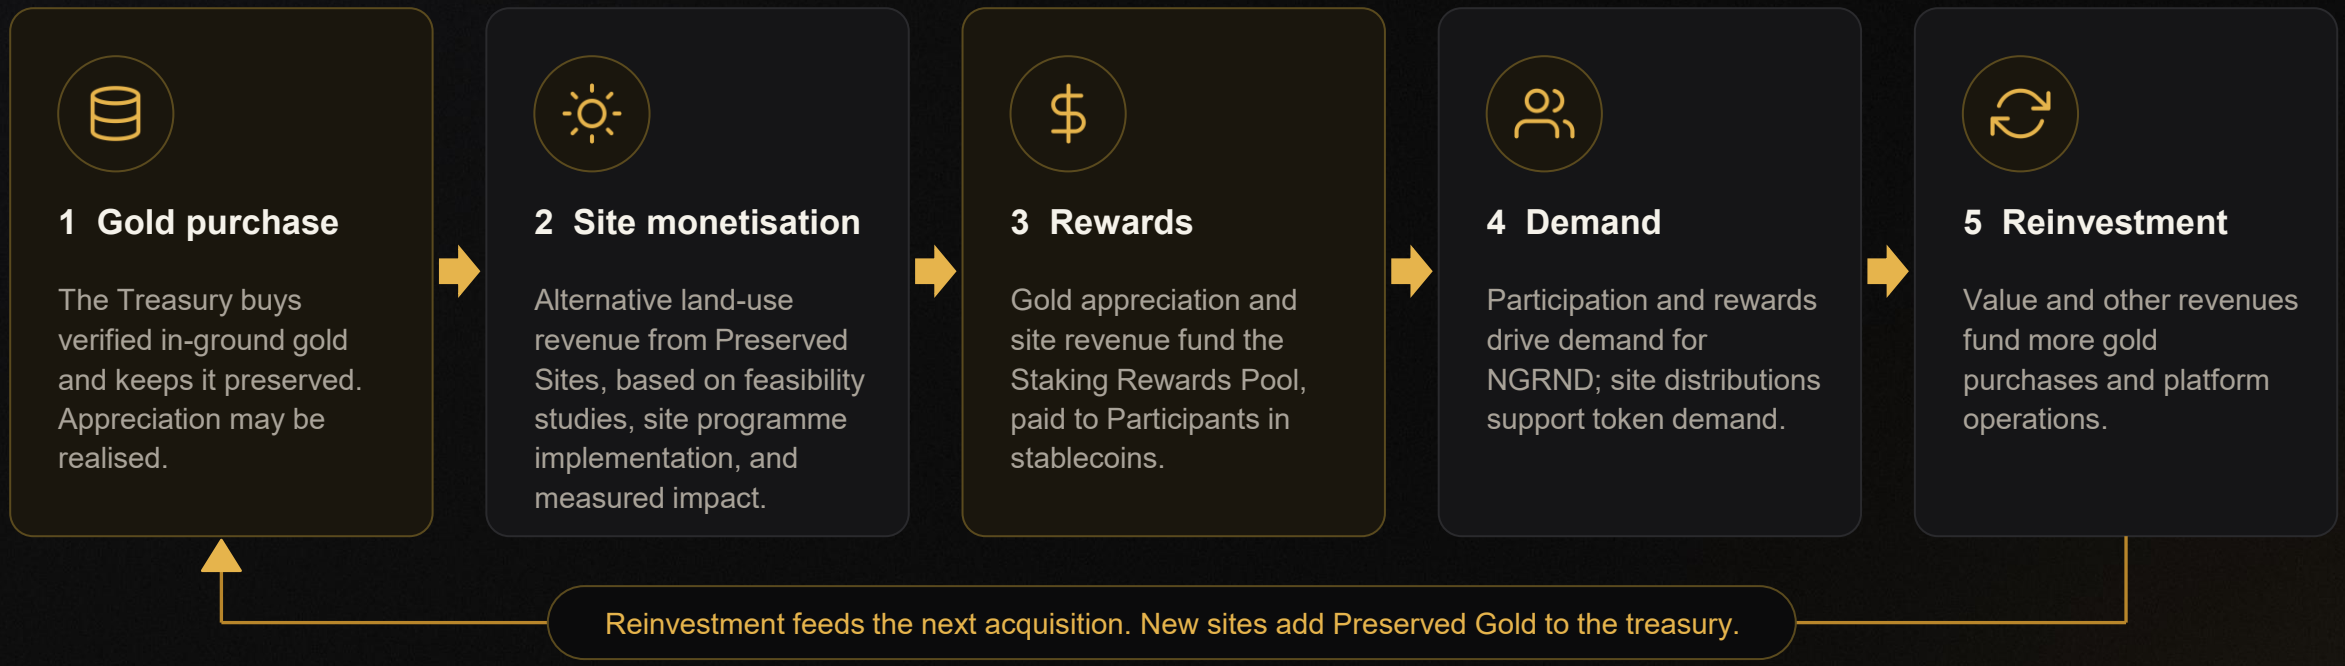
Then every quarter end

Quarterly reward redemptions from Q2 2027, in USDC or USDT generated from gold site programme distributions, realised gold gains, ecosystem and other revenues.

Staking rewards are not guaranteed returns. Rewards and distributions are subject to applicable laws, treasury performance, qualifications and platform governance. NGRND does not represent ownership of Preserved Gold or any underlying mineral interest. Rewards are conditional, not guaranteed.

THE ECONOMIC LOOP

How value moves through the protocol



Economic loop as described in the whitepaper Protocol Summary. Rewards and distributions may be paid in USDC, USDT or other stablecoins, subject to applicable laws, treasury performance and platform governance. NGRND does not represent ownership of Preserved Gold or any underlying mineral interest. Rewards are conditional, not guaranteed.

THE TOKEN IN ONE SLIDE · PROPOSED, NOT YET FINAL

850 million NGRND, built for supply discipline

850M
Maximum supply

$0.10
Public TGE price

$85M
Fully diluted value at public price

$16.79M
Initial market cap at $0.10

167.875M
Tokens unlocked at TGE (19.75%)

~40%
of the TGE unlock is liquidity

THREE COMMITMENTS

- No more than 5% of tokens released in any month, except at TGE
- All unsold inventory returned to Treasury
- Purchased tokens in vesting are auto-staked and accrue rewards before release

Three rounds to a $24.3M hard cap: Seed $0.04, Pre Launch $0.05 to $0.095, Exchange Sales $0.10. Rewards paid in USDC or USDT; first redemption 31 March 2027. Known scheduled releases rise from 167.875M at TGE to 722.5M by month 39; the 15% Treasury Reserve is released by governance vote.

Full allocation, lockups, release curve, rounds, use of funds and Reward Levels: Appendix A1 to A5

FDV is not a guarantee of market value. TGE date not confirmed. Figures from ngrnd.io/tokenomics, 12 October 2026, labelled proposed and not yet final.

TEAM ROADMAP · 12 OCTOBER 2026 · PROJECTIONS, NOT GUARANTEES

From TGE to 31 million participants

Q3 2026

172K participants

0.41K oz Preserved Gold

- Gold Protocol Rewards launched
- Task programmes initiated
- Tokenomics finalised

Q4 2026

400K participants

~7.7K oz Preserved Gold

- TGE
- Finalise all smart contracts
- Exchanges and market makers
- Onboard KOLs, 12 DSBTs

Q1 2027

820K participants

~13.0K oz Preserved Gold

- First rewards and staking redemption
- Trading cards, streams, DSBTs
- Integrated dashboard

Q2 2027

1.47M participants

~13.0K oz Preserved Gold

- Governance and treasury actions
- Quarterly reward redemption
- Full AI Agent integration

Q4 2027

3.82M participants

~4.9K oz Preserved Gold

- Quarterly reward redemption
- Accelerate growth, rewards, revenues
- Add streams and DSBTs

Q4 2028

16.5M participants

~4.9K oz Preserved Gold

- Quarterly reward redemption
- Accelerate growth, rewards, revenues
- Add streams and DSBTs

2029

31M participants

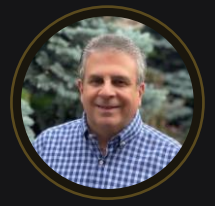
~20K oz Preserved Gold

- Quarterly reward redemptions
- Continue revenue programmes
- Accelerate reward programmes

Team-supplied plans and projections. The Q3 2026 entry reproduces the team's historical baseline; completion has not been independently verified. Preserved Gold figures in ounces as supplied; whether each is a balance or a period addition awaits confirmation. Not a valuation or token backing.

TEAM

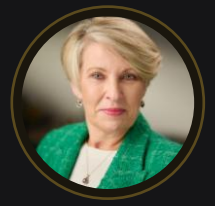
Five founders, fully public



David Lucatch

FOUNDER

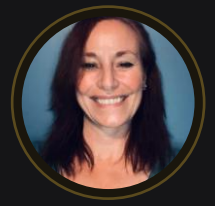
Serial entrepreneur, 40+ years, multiple exits. Raised $200M+ for tech and consumer platforms.



Prof. Lisa Wilson

FOUNDER

Top 20 blockchain, ESG and digital assets thought leader. Former IAL, Rio Tinto, BHP.



Lynn Cumiskey

FOUNDER

30+ years in compliance, securities and corporate governance. Senior VP, Pegasus Fintech Group.

Cath Thrupp

FOUNDER

Founder and CEO of CarbonPlanet. Career in carbon, biodiversity and natural resources.

Dr. Mazdak Rafaty

FOUNDER

PhD Economics and International Management. 200+ companies supported in MENA.

DD

Dinko Dinkov

Chief Technology Officer, appointed July 2026

GT

George Tsiolis

Senior Advisor, Investor Relations

VS

Vincent Sciglitano

Senior Advisor, Business Relations

GH

Greg Hall

Senior Advisor, Site Programmes

Named founders with public track records across technology, ESG, compliance and natural capital. Full team and advisors at ngrnd.io/team.

What we are raising, and what it builds

THE RAISE

$24.3M hard cap

- Seed at $0.04 and Pre Launch at $0.05 to $0.095, ahead of a public TGE price of $0.10
- Nearly half of proceeds into verified Preserved Gold for the treasury; initial target up to 12,000 ounces
- Alternative land-use feasibility studies for each Preserved Site
- A rewards engine that is already live, with 347,082 platform accounts and eight partner DSBT routes

Total	**100%**	**850,000,000**	**167,875,000 at TGE**		

Staking and Rewards is a fixed pool, not new emissions. Known scheduled releases rise from 167,875,000 at TGE to 722,500,000 by month 39, excluding the governance-controlled Treasury Reserve.

SALE ROUNDS

ROUND	PRICE	TOKENS	SHARE	TARGET RAISE	TGE	LOCKUP	LINEAR
Seed	$0.04	51,000,000	6%	$2,040,000	0%	8 mo	24 mo
Pre Launch	$0.05 to $0.095	76,500,000	9%	$5,255,550	10%	6 mo	18 mo
Exchange Sales	$0.10	170,000,000	20%	$17,000,000	50%	None	12 mo
Total		**297,500,000**	**35%**	**$24,295,550**			

Purchased tokens still in vesting are automatically staked from TGE and accrue rewards before release; vesting and release schedules are unchanged. KOL sale terms pending. Token purchases coming soon for badge holders.

RELEASE COMMITMENTS

- **Monthly cap.** No more than 5% of tokens released in any month, except at TGE.
- **Unsold inventory.** Returned to Treasury.
- **Auto-staking.** Vesting tokens are staked and accrue rewards before release.
- **Supply management.** Discretionary, revenue-funded buy-backs and burns, subject to governance. Not a guaranteed market intervention.

REWARDS AND TREASURY

- **Paid in stablecoins.** USDC, USDT or other permitted stablecoins, not newly issued NGRND; subject to qualifications, applicable laws, treasury performance and governance.
- **Funded by revenue.** Realised Preserved Gold appreciation, site programme distributions, ecosystem and other revenues.
- **Redemptions.** First on 31 March 2027, then at each calendar quarter end.
- **Reward Levels.** Twenty. Levels 4 to 20 purchased, 100 to 5,000,000 tokens staked, multipliers 1.0× to 6.0×, applied to points, not an APR.
- **Dual treasury.** Preserved Gold Treasury under independent digital custody (35,000 : 1); Protocol Token Treasury as the operating reserve.

USE OF FUNDS (WHITEPAPER)

Verified gold acquisition	47.17%
General working capital	22.25%
Land-use feasibility studies	11.40%
Marketing	7.75%
Professional services	6.23%
Token development	3.25%
Corporate, G&A	1.95%

Nearly half of proceeds go straight into verified Preserved Gold for the treasury. Unsold inventory returns to Treasury. Hard cap is the maximum, not funds raised. TGE timing and the KOL sale terms are not yet final.

Round figures from ngrnd.io/tokenomics (12 October 2026). Use of funds percentages from the whitepaper Protocol Summary; corporate and G&A combined. Subject to final Terms of Sale.

Twenty Reward Levels. Stake more, earn more per action

Level	Type	Min. tokens staked	Participation multiplier	Daily reward points
1	Earned	1 + Gold $NUGS conversion	**0.2×**	1
3	Earned	1 + Gold $NUGS conversion	**0.5×**	1
4	Purchased	100	**1.0×**	5
6	Purchased	1,000	**1.4×**	15
9	Purchased	10,000	**2.0×**	100
12	Purchased	100,000	**2.75×**	1,000
15	Purchased	500,000	**3.5×**	5,000
17	Purchased	1,000,000	**4.0×**	10,000
20	Purchased	5,000,000	**6.0×**	50,000

How to read the table

- Levels 1 to 3 are earned; levels 4 to 20 are purchased by staking NGRND.
- The multiplier is applied to points from each participation stream event and posted to your account.
- Badges, boosts and bonuses increase base daily rewards. Safecracker daily combinations rise with level.
- Showing 9 of 20 levels. The full matrix is published at ngrnd.io.

Reward Points and multipliers do not represent an APR or a guaranteed return. Staking amounts are token counts, not cash or points. Source: team-supplied Reward Level matrix, 15 October 2026.

From a free credential to stablecoin rewards in four steps

1

FREE

Get your DSBT

A free, non-transferable Dynamic Soulbound Token on Base. Identity, access and history in one place. Comes with one virtual NGRND. No purchase required.

2

TOKEN

Buy and stake NGRND

Staking sets your Reward Level and multiplies the points your participation earns. 10% released at TGE, the remainder on the round schedule.

3

POINTS

Participate in 8 streams

Earn Reward Points across Governance, Impact, Learn, Play, Advocate, Refer, Wellbeing and AI Agent. Bonuses and boosts from Stream Partners.

4

STABLECOINS

Get rewarded

Reward Points are redeemable, subject to qualifications, from 31 March 2027 and at every quarter end after that. Paid in USDC or USDT.

THE EIGHT PARTICIPATION STREAMS

Governance · Impact · Learn · Play · Advocate · Refer · Wellbeing · AI Agent

Participation is open before purchase. Token purchases coming soon for badge holders. NGRND does not represent ownership of Preserved Gold or any underlying mineral interest. Rewards are conditional, not guaranteed.

A6 · TRUST LAYER

Built on Base, audited contracts, independent custody

Base blockchain

DSBT credentials and the NGRND token are built on the Base blockchain.

Team.Finance contracts

Token issuance, lockup, vesting, treasury and rewards distribution managed through Team.Finance.

Audited

The EVM token creation contract planned for NGRND has been audited by CertiK. Contracts audited by firms including CertiK, Hacken and Bailsec.

Independent digital custodian

A regulated custodian records legal ownership, custody and reporting of Preserved Gold attributes and potential appreciation.

Verified resources

Geological verification under NI 43-101, JORC, S-K 1300, SAMREC or equivalent internationally recognised standards.

Measured on-chain

Digital MRV and eDNA data from site programmes integrated into on-chain records for tamper-resistant audit trails.

No contract address has been published. Any address circulating before an official announcement is unverified. Additional details will be provided as they become available.

A7 · HOW NGRND COMPARES

Treasury-supported utility, not a vault receipt

	nGRND Gold Protocol	Vaulted gold tokens	Physical gold
Underlying value	**Dual treasury: Preserved Gold in the ground plus a token treasury**	Physical gold held in a vault	Physical gold
Extraction required	**No. Gold is verified and kept in the ground**	No, but supply is already mined	Yes
Yield	**Staking and ecosystem rewards in stablecoins, not guaranteed**	None, or limited	None
Token utility	**High: staking, access, payments, Reward Levels**	Minimal	None
Governance participation	**Yes, through the Governance stream**	No	No
Scalability	**High: not limited by mining**	Limited by vaulted supply	Limited

Adapted from the comparison table in the whitepaper Market Opportunity section, which does not name the products it compares. NGRND does not represent ownership of Preserved Gold or any underlying mineral interest. Rewards are conditional, not guaranteed.

Below ground, an asset. Above ground, six revenue pillars

Each Preserved Site carries monetisation rights for 30 to 100 years. Independent ecological and sustainability specialists develop a feasibility study for every site programme from study initiated. Site revenue flows to the staking and rewards pool.

Impact is measured, not assumed: digital MRV, satellite monitoring, IoT, drones and eDNA sampling, integrated into on-chain records.

Avoided mining

Uneconomic proven gold left in the ground; brownfield reclamation of waterways and tailings.

Carbon sequestration

Regenerative grazing and cropping, afforestation and protection of existing biomass.

Biodiversity credits

Habitat restoration, threatened-species protection and ecological stewardship.

Solar microgrids and clean energy

Infrastructure leasing and energy supply agreements where land and conditions allow.

Sustainable infrastructure

Data centres, research facilities, ecotourism, education and logistics, by location.

Traditional Owner partnerships

Land management, cultural stewardship and local employment with Indigenous communities.

Programme aims and environmental potential, not verified project outcomes. Six pillars as set out in the whitepaper Protocol section.

The oldest store of value is moving on-chain

+65%

Gold's largest annual return since 1979, in 2025

J.P. Morgan Private Bank, 2026

22%

of gold investment over the last ten years was digital, including ETFs

World Gold Council, 2026

580M+

people hold digital assets, 9.9% global adoption

Singh, 2026

70%

Gen Z digital asset adoption; Millennials 61%

Whitepaper, Market Opportunity

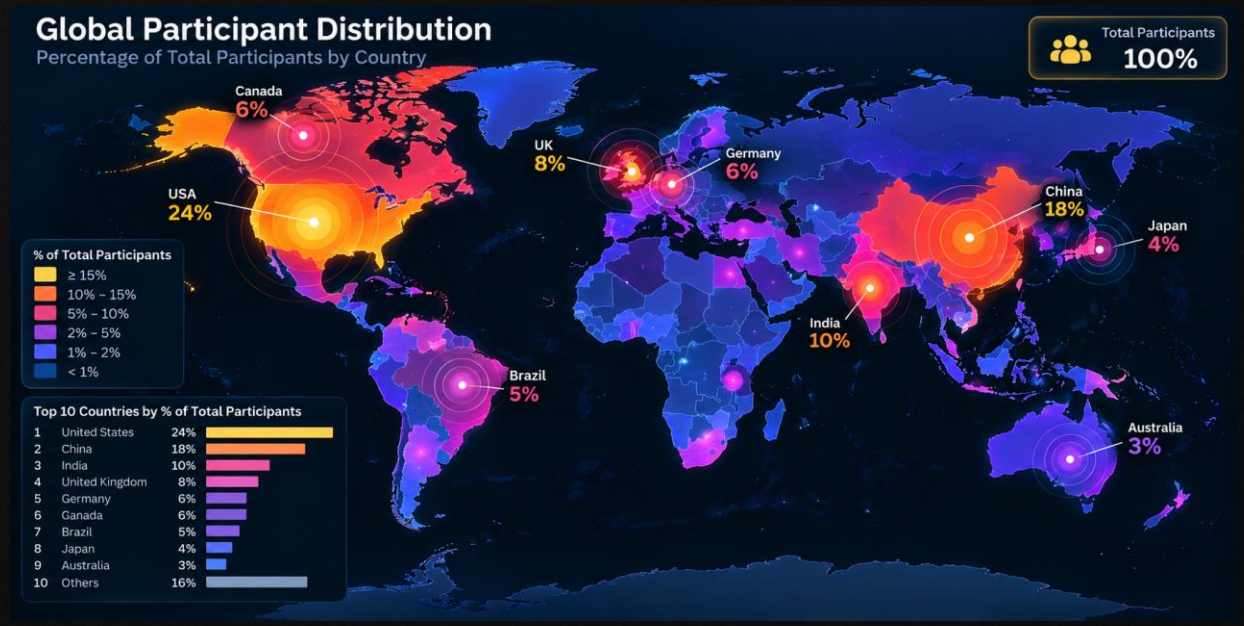
Two markets that have barely met

Gold had its best year in a generation. Digital assets reached mainstream adoption, led by the generations that invest through a wallet, not a broker.

Yet tokenised gold still mirrors bars in a vault: a receipt with little or no yield, minimal utility and no say in how the asset is managed.

Sources as cited in the nGRND Gold Protocol whitepaper, Market Opportunity section. Figures are third-party market statistics, not nGRND performance.

Where participants come from, and the games that brought them



TOP COUNTRIES BY SHARE OF PARTICIPANTS

US 24%	China 18%	India 10%	UK 8%
Germany 6%	Canada 6%	Brazil 5%	Japan 4%

Gaming reach

1.2 Million+

816K Gold Fest participants (GAMEE)

387K Dig It players

- Dig It and the Funny Till U Die gaming IP portfolio acquired, 22 July 2026
- GAMEE launched Gold Fest Season 2 with nGRND sponsorship, 20 August 2026
- Safecracker game live, 1 October 2026
