

THE TOKEN · NGRND GOLD PROTOCOL · BUILT ON BASE

NGRND in one page

Gold in the ground powers the Ecosystem. NGRND, the utility token of the Gold Protocol, distributes that value to Participants: a dual treasury of Preserved Gold and NGRND, a participation economy that is already live, and rewards paid in stablecoins rather than new tokens.

● Land and participation

● Token and treasury

HOW VALUE REACHES PARTICIPANTS

- Gold in the ground**
The nGRND Group holds verified Preserved Gold (NI 43-101, JORC) with site monetisation rights for 30 to 100 years across six revenue pillars.
- The Protocol buys it, 35,000 : 1**
The Treasury buys in-ground gold from the Group and keeps it preserved, with an independent custodian. Site revenue flows to the rewards pool.
- Stake NGRND, set your Reward Level**
Utility token of the Gold Protocol, on Base. Staking sets your Reward Level and multiplies the points you earn. Used for access, payments, Governance.
- Participate in eight streams**
A free DSBT credential gives identity and access. Reward Points come from Governance, Impact, Learn, Play, Advocate, Refer, Wellbeing and AI Agent.
- Get rewarded in USDC or USDT**
From realised gold appreciation, site distributions and ecosystem revenues, not new NGRND. From 31 March 2027, then every quarter end. Not guaranteed.

Participation and rewards drive demand for NGRND; site distributions support token demand. Value and other revenues fund more gold purchases and platform operations.

NGRND does not represent ownership of Preserved Gold or any underlying mineral interest. Rewards are conditional, not guaranteed. Risk of total loss: NGRND is a utility token, not a security; it confers no equity, dividend, voting or repayment right; purchases are final and non-refundable. Sources: ngrnd.io, ngrnd.io/tokenomics (12 October 2026), the public stats API (26 October 2026) and the Reward Level matrix (15 October 2026). FDV is not a market value.

Maximum supply

\$0.10

Public TGE price

\$85M

FDV · \$16.79M initial market cap

SUPPLY RELEASE

Unsold tokens return to Treasury. Vesting tokens are auto-staked and earning.

THE RAISE · \$24.3M HARD CAP

Nearly half of proceeds go straight into verified Preserved Gold for the treasury. Hard cap is the maximum, not funds raised.

20 REWARD LEVELS · 0.2x TO 6.0x

Stake 100 to 5,000,000 NGRND for 1.0x to 6.0x on the points you earn across eight streams. Levels 1 to 3 earned, 4 to 20 purchased. Not an APR.
